

Teaching with Technology

As a teacher we need to be 'always learning, acquiring knowledge and implementing what we have learnt.' Why, because that is the nature of our profession, or at least it should be. We should be aware of upcoming trends in education, we should be technologically savvy and we should be integrating these skills into our teaching. Again why? Because that is where our students are at and studies have shown that technology is developing into a great tool for engagement, creativity and for diversifying lessons for different learning styles and abilities.

The big question is *how* to do this without one first...

Being shown?

Being taught?

Being informed?

There are 3 steps one can take to become technologically savvy:

Have a Go

If you are a teacher who has been given a new laptop, sit down, open the lid and start using the various applications (apps) on your computer. You will make mistakes, find cool tricks and despite some frustration you will learn something.

Look Around

There are so many 'how to' videos on YouTube, Blogs and other pet projects on the internet that it is almost out of control. If a student wants to learn how to edit in photoshop, play a song on the guitar like Slash or even hack a website - they look for a specific tutorial online. Do a Google search and you will be amazed!

Get Creative

Your mind and imagination are your only limitation with technology. Look at Textbooks, ISSUU.com, WIX.com and other sites for inspiration or even become a part of online education communities and exchange ideas. Then get creative!

BE
TECHNOLOGICALLY
SAVVY

HAVE A GO
LOOK AROUND
GET CREATIVE

Websites to Visit

<http://www.apple.com/downloads/macosx/> - the Apple downloads page sorted by categories such as Learning, Music or Maths & Science. Some are freeware and shareware and best of all *made for mac*.

<http://osx.iusethis.com/> - A general website with lists of applications for every use imaginable. Some are freeware others shareware and it describes each within searchable categories. Best of all, it covers both the Mac and Windows platforms.

Apps I Use

- [Evernote](#) - Sort, Organise, Note, Dictate, Photograph, Annotate (awesome app)
- [Busycal](#) - A calendar app that is iCal on steroids
- [MindNode](#) - Clear, efficient and free mind-mapping software for the Mac
- [The Hit List](#) - A ToDo app with tick boxes and a clear GUI (general user interface)
- [Paperless](#) - Organise all your PDF documents in an iTunes type interface
- [Bee Doc Timeline](#) - Make excellent and engaging 3D timelines
- [ScreenFlow](#) - Video, annotate, upload to the net your tutorials, lessons...
- [Voila](#) - Make screen shots of your computer and then edit & annotate them
- [Times](#) - A virtual newspaper on your screen for every type of news & RSS feed you wish to subscribe to
- [1Password](#) - Excellent password keeper, manager and generator for the web
- [Bruji 'Pedias'](#) - Awesome CD, DVD, Book and Game cataloguing software that turn your mac's built-in camera into a barcode scanner to enter in all your CD's, DVD's and more

Freeware & Shareware

Spend some time looking at these links for ideas

Freeware - free to download and use

Shareware - requires you to pay for a license

Donationware - this is free and the developer would like some money

Icons & Desktops

You can download little pictures (icons) and attach them to your folders to make them more interesting (or easier to see and sort).

Click on a downloaded icon

Hit 'Command i' on your keyboard

Click on the little picture that pops up in the open window

Hit 'Edit > Copy' in the top menu bar

Then...

Click on the folder you want to have that icon

Hit 'Command i' on your keyboard

Click on the little picture that pops up in the open window

Hit 'Edit > Paste' in the top menu bar

Voila...

Your folder now has an icon attached to it!

<http://interfacelift.com/icons/downloads/date/any/>

<http://iconfactory.com/home>

<http://www.icons.cx/icons/>

<http://www.iheartny.com/>

<http://www.pixelgirlpresents.com/>

<http://www.wackypixel.com/community01.html>

<http://www.icondrawer.com/>

<http://www.vladstudio.com/home/>

- Icons
- More icons
- Again more icons
- Yep, icons
- Hundred of icons
- Wacky icons
- A few icons
- Desktops...and icons

If you would like any more application ideas or even some IWB (interactive whiteboard) links & resources visit: wrightstuffmusic.com & <http://www.youtube.com/user/Wrightstuffmusic>

Additionally, **you** may have some excellent ideas and/or links already. Please send them to me and I will include them on this publication to make it truly a **collaborative project**.
